WARNINGS & CAUTIONS

WARNINGS

TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK.

- DO NOT EXPOSE THIS PRODUCT TO RAIN OR MOISTURE.
- DO NOT INSERT ANY METALLIC OBJECTS THROUGH THE VENTILATION GRILLS OR OTHER OPENINGS ON THE EQUIPMENT.

CAUTIONS

EXPLANATION OF GRAPHICAL SYMBOLS

The lightning flash with arrowhead symbol, within a triangle, is intended to alert the user to the presence of uninsulated, dangerous voltage within the products enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instruction in the literature accompanying the product.

COMPLIANCE STATEMENT

FCC INFORMATION: THIS EQUIPMENT HAS BEEN TESTED AND FOUND TO COMPLY WITH THE LIMITS FOR A CLASS A DIGITAL DEVICE, PURSUANT TO PART 15 OF THE FCC RULES. THESE LIMITS ARE DESIGNED TO PROVIDE REASONABLE PROTECTION AGAINST HARMFUL INTERFERENCE WHEN THE EQUIPMENT IS OPERATED IN A COMMERCIAL ENVIRONMENT. THIS EQUIPMENT GENERATES, USES, AND CAN RADIATE RADIO FREQUENCY ENERGY AND IF NOT INSTALLED AND USED IN ACCORDANCE WITH THE INSTRUCTION MANUAL, MAY CAUSE HARMFUL INTERFERENCE TO RADIO COMMUNICATIONS. OPERATION OF THIS EQUIPMENT IN A RESIDENTIAL AREA IS LIKELY TO CAUSE HARMFUL INTERFERENCE IN WHICH CASE THE USER WILL BE REQUIRED TO CORRECT THE INTERFERENCE AT HIS OWN EXPENSE.

CAUTION: CHANGES OR MODIFICATIONS NOT EXPRESSLY APPROVED BY THE PARTY RESPONSIBLE FOR COMPLIANCE COULD VOID THE USERS AUTHORITY TO OPERATE THE EQUIPMENT.

THIS CLASS A DIGITAL APPARATUS COMPLIES WITH CANADIAN ICES-003.

CET APPAREIL NUMERIQUE DE LA CLASSE A EST CONFORME A LA NORME NMB-003 DU CANADA.

CE COMPLIANCE STATEMENT

WARNING

THIS IS A CLASS A PRODUCT. IN A DOMESTIC ENVIRONMENT THIS PRODUCT MAY CAUSE RADIO INTERFERENCE IN WHICH CASE THE USER MAY BE REQUIRED TO TAKE ADEQUATE MEASURES.

IMPORTANT SAFEGUARDS

1. Do not expose the camera to rain or moisture -

The OPTIX camera itself is designed for enclosed use or for use in a location where it is protected from rain and moisture. When exposed to moisture, turn the power off immediately and ask a qualified service personnel for servicing. Moisture can damage the camera and also create the danger of electric shock.

2. Do not install this camera upside down -

This camera is designed for mounting on the ceiling or wall.

If you install this camera upside down, for example, mounted on the floor, it may cause malfunction.

3. Do not attempt to disassemble the camera -

To prevent electric shock, do not remove screws or covers.

There are no user serviceable parts inside.

Ask a qualified service personnel for servicing.

4. Avoid placing the camera in direct sunlight -

Do not aim the camera at bright objects.

Whether the camera is in use or not, never face the unit towards direct sunlight or other extremely bright objects. Otherwise blooming or smearing may be caused.

5. Do not use strong solvents or detergents -

Use a dry cloth to clean the camera when it is dirty. If it is hard to remove the dirt on the camera, use a mild detergent and wipe it gently.

6. Handle the camera with care -

Do not abuse the camera. Avoid striking, shaking, etc.

The camera could be damaged by improper handling or storage.

7. Before operating, please check proper

temperature, humidity and power source ratings -

-Use the camera under conditions where temperature is between 0C - 45C and humidity is below 60%. The input power source is 24VAC 850mA.

8. Do not use the camera in such places as shown below. The lens may become cloudy due to condensation if the camera is used under the following conditions -

- Rapid temperature fluctuation by switching an air conditioner on and off.
 - Rapid temperature fluctuation due to frequent door opening and closing.
 - Used in an environment where eyeglasses become foggy.
 - Used in a room filled with cigarette smoke or dust.
- If the lens becomes cloudy due to condensation, remove the dome cover and wipe all moist surfaces with a soft cloth.

9. Consumables -

Parts having contacts such as the lens-drive motors, cooling fan motor and slip-rings built inside the camera are subject to wear with time.

For information on the replacement and maintenance of such parts, please ask the nearest service center.

1. INTRODUCTION

Features

This OpenEye OPTIX Pro-Pack Dome Camera is the building block for any surveillance/security system. By using multiple Pre-Packaged dome cameras, no place is too large for monitoring. Extensive and flexible architecture facilitates remote control functions for a variety of external switching devices such as multiplexers and DVRs.

A. CAMERA UNIT

- Built in 25X Optical Power Zoom Camera with True Day & Night Function
- 999 ID & 319 Preset Position
- 8 Tours consist of Preset Tour, Auto Scan and Pattern. Tour itself can be programmed with over 300 functions and Preset locations. While moving, each preset scan be watched in smooth Vector Scan mode.
- 8 Auto Scan, including Vector Scan
- 4 Pattern (240 Seconds)
- 8 Privacy Zones
- 8 Alarm Inputs / 4 Alarm Outputs (NC & NO)
- Variable speed from 0.1/sec to 90/sec
- Turbo speed is Max 360/sec with Ctrl pressed
- Maximum speed is inversely proportional to the zoom ratio
- Programmable user preferences (Alarm, Preset, Title, etc..)
- Up to 999 selectable camera addresses (4095 Optional)
- Built in RS-485/422 receiver driver
- Built in Power Surge Protection and Lightning Protection
- Bubble dome with black inner shield for concealing the camera

Power Consumption

- OpenEye Optix Power Consumption:
850mA 24VAC (20W)
- Camera with Outdoor Housing (Pre-Packaged)
Max Power Consumption: 68W (2,850mA 24VAC)
Higher than 24VAC 3A spec Power Adapter is required for Camera + Outdoor housing
- Outdoor Housing Power Consumption:
Cooler: 50mA 24VAC (1.2W) * 2 = 2.4W
Heater: 1,000mA 24VAC (24W) * 2 = 48W

2.INSTALLATION / CONFIGURATION

2.1 Basic Installation

A. PACKAGE CONTENTS

	Qty
OPTIX Pre-Pack Dome (Dome Camera Unit)	1
Ceiling Mount Bracket	1
Joint Pipe	1
Plastic Anchor	4
Screws for Plastic Anchor	4
L-Wrench (M4)	1
L-Wrench (M5)	1
Block Protector Cap	1
Cable (Alarm In/Out)	2
Instruction Manual	1
Silicon Rubber Sealant	1
Teflon Tape	1

B. PART LIST

Figure 1 - Parts List

2. INSTALLATION / CONFIGURATION

C. BASIC CONFIGURATION

Figure 2 - Basic Installation Diagram

2. INSTALLATION / CONFIGURATION

The Pro-Pack dome camera must be installed by qualified service personnel in accordance with all local and federal electrical and building codes. The system should be installed according to Figures 3 through 9.

⚠ The Pro-Pack OPTIX dome camera is for use in surface mounting applications. The mounting surface should be capable of supporting loads up to 10lb(4.5Kg). The Pro-Pack OPTIX dome camera's base should be attached to a structural object, such as hard wood, a wall stud, or ceiling rafter that supports the weight of the dome camera.

Figure 3 - Removing Plastic Film

Wrap teflon tape around the joint pipe threads before attaching the Ceiling Mount Bracket and the Pipe Flange.

Seal the surface of the ceiling mount bracket with an 1/8" bead of the sealant included in the camera packaging.

Note: The bead of sealant must be 1/2 " from the perimeter to ensure a proper seal.

Figure 4 - Installation of Pole Mount

2.INSTALLATION / CONFIGURATION

The Pro-Pack dome camera must be installed by qualified service personnel in accordance with all local and federal electrical and building codes. The system should be installed according to Figures 3 through 9.

Figure 5 - Layout of Switches

D. SETTING UP THE UNIT FOR TERMINATION

The device which is connected at end of line, whether it be a dome camera or keyboard controller, must have the cable for communication terminated by setting the appropriate DIP switch. Without proper termination, there is potential for control signal errors. Total length of the cable for communication should not exceed 3,000 feet.

Figure 6 - Termination of Dome Camera Data Line

2.INSTALLATION / CONFIGURATION

The dome camera must be installed by qualified service personnel in accordance with all local and federal electrical and building codes. The system should be installed according to Figures 3 through 9.

Figure 7 - Example Termination Diagram

E. SETTING THE CAMERAADDRESS (ID)

To prevent damage, each dome camera must have a unique address (ID). When installing multiple dome cameras using a multiplexer, it is suggested that the dome camera address match the multiplexer port number.

Figure 8 - Setting Address (ID) of DomeCamera

2.INSTALLATION / CONFIGURATION

F. SETTING UP THE DIP SWITCH

If a dome camera is to be installed with an OPTIX dome keyboard controller, select the OpenEye OPTIX Protocol. Consult OpenEye technical support if a dome camera is installed with a device other than a keyboard.

1	2	3	4	Protocol
OFF	OFF	OFF	OFF	OpenEye OPTIX
OFF	OFF	OFF	ON	P-D Type
OFF	OFF	ON	OFF	P-P Type
OFF	OFF	ON	ON	Samsung

5	6	Baud rate
OFF	OFF	9600
OFF	ON	4800
ON	OFF	2400
ON	ON	1200

7	Function
ON	RS-422
OFF	RS-485

8	Function
ON	PAL
OFF	NTSC

2. INSTALLATION / CONFIGURATION

2.2 Connecting Wiring

A. CONNECTING RS-485/422

The dome camera can be controlled remotely by an external device or control system, such as control keyboard, using RS-485 half duplex, RS-422 duplex or simplex serial communications signals. Connect marked RX+, RX- to TX+ and TX- of the RS-485 control system.

If control system is RS-422, connect TX+(TRX+), TX-(TRX-) of the dome camera to TX+, TX- and RX+, RX- of the control device respectively.

B. CONNECTING VIDEO OUTPUT CONNECTOR

Connect the video out (BNC) connector to the monitor or video input.

C. CONNECTING ALARMS

AL1 to 8 (Alarm In)

You can use external devices to signal the dome camera to react to events. Mechanical or electrical switches can be wired to the AL (Alarm In) and GND (Ground) connectors. See Chapter 3 - Program and Operation for Configuring Alarm Input.

Note: All the connectors marked GND are common.

Connect the ground side of the alarm input and/or output to the GND connector.

NC (NO) 1 TO 4 (Normally Closed or Normally Open: Alarm Out)

The dome camera can activate external devices such as buzzers or lights. Connect the device to the NC (NO) (Alarm Out) and COM (Common) connectors. See Chapter 3 - Program and Operation for Configuring Alarm Output.

D. CONNECTING THE POWER

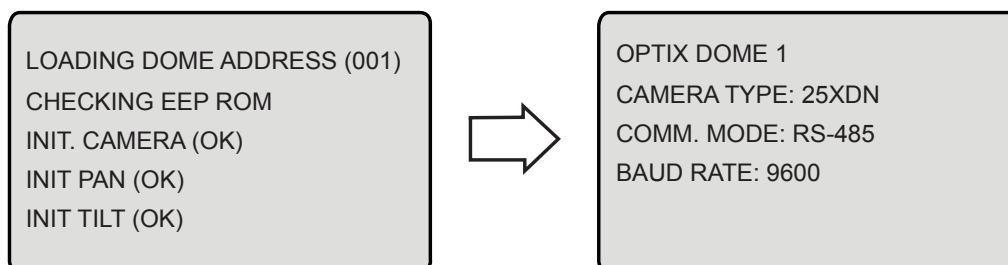

Connect the AC 24V 850mA Power Adaptor to the OPTIX dome camera.

2.INSTALLATION / CONFIGURATION

2.3 Getting Started

Once installed, apply power to the dome camera. Once power is turned on, the dome camera will start a configuration sequence. When configuration is done, the following information is displayed.

3. PROGRAM & OPERATION

3.1 Getting Started

Before you program or operate OpenEye OPTIX Dome Camera, you must select the dome camera by pressing the dome camera NO + CAM on the OpenEye Keyboard Controller.

Example: Pressing 1, 0 and CAM key sequentially will select the dome camera 10. The selected dome camera ID will be displayed on the LCD monitor of the OpenEye Keyboard Controller.

3.2 Accessing On-Screen Menu Utility

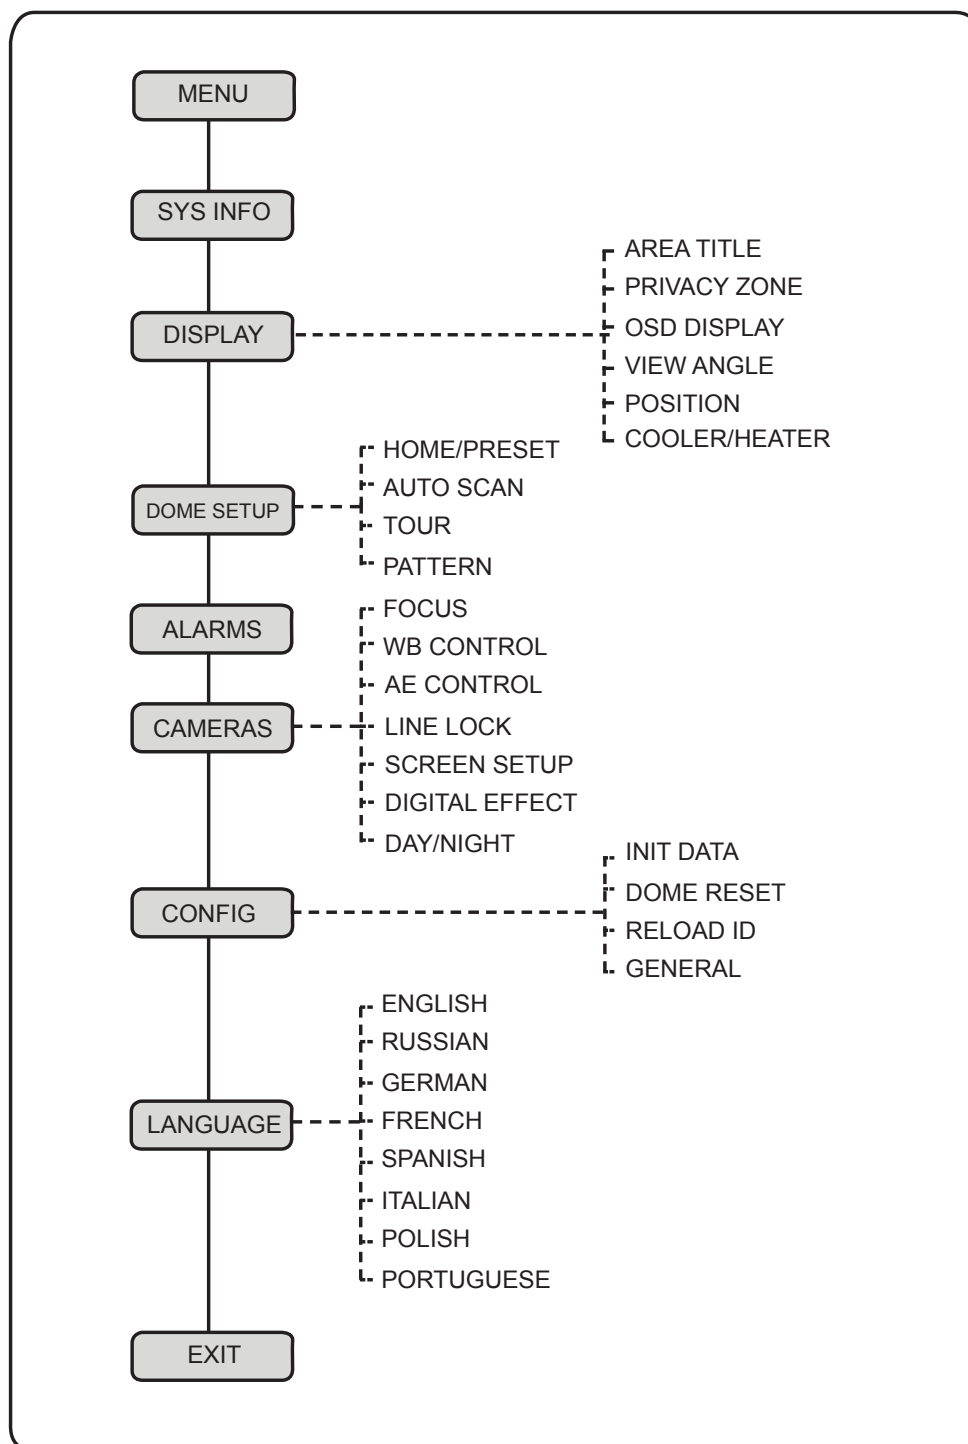

A. CONTROLLING THE ON-SCREEN UTILITY

You can open the On-Screen menu utility on your monitor by pressing the (MENU) KEY on the keyboard controller. The following On-Screen utility will appear.

ACTION	FUNCTION
MENU	Call on On-Screen Menu Utility or Exit (Escape)
Joystick left or right	Go into the sub-menu items.
	Execute the command (Exit)
	Change Value
	Navigate through menu items
Joystick up or down	Navigate through menu items
Joystick down	Finish editing title
Zoom Handle twist	Change Value
	Enter editing title mode.
CTRL + Joystick	Change value of angle/zoom ratio
CLR/ESC	Move to the previous mode

3. PROGRAM & OPERATION

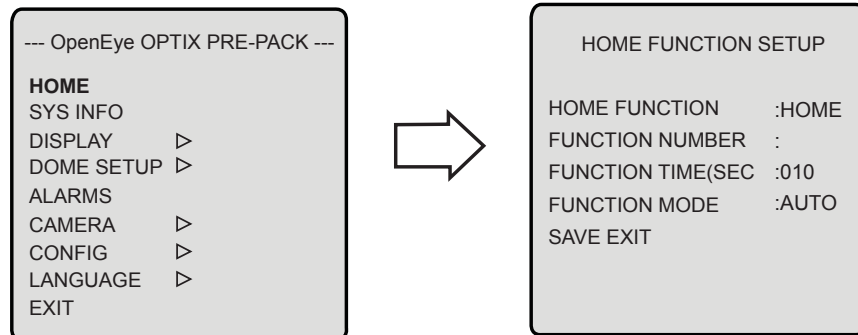

A. OPTIX HIGHSPEED DOME MENU

4. PTZ SETUP MENU

4.1 HOME

After a dome control menu item has been selected, follow the directions below to set the function.

The HOME function can be set so that the camera automatically goes to Preset, Tour, Pattern, or Auto Scan after the OpenEye Keyboard Controller has been idle for an amount of time. For example, if a joystick controller is idle for 10 seconds (FUNCTION TIME), the camera goes to the previous mode.

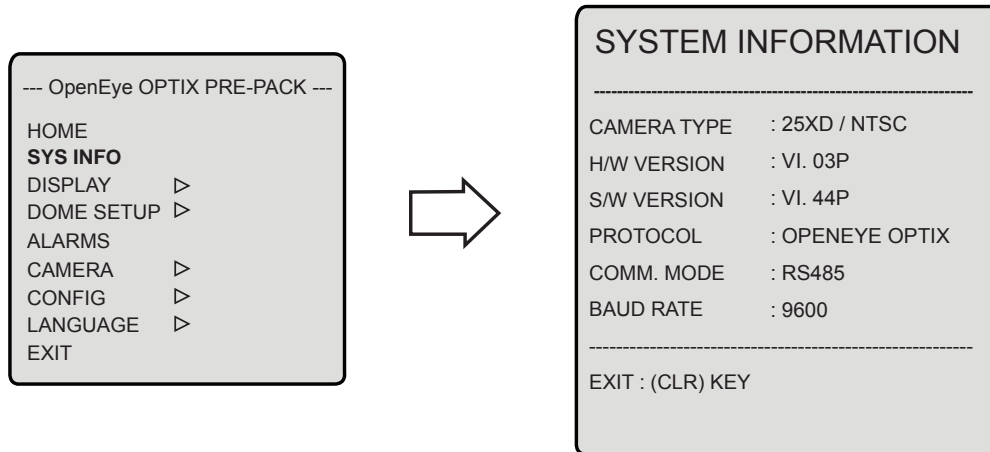

Follow these steps to program the Home Function:

1. Select MENU to display the main menu on the monitor. Select HOME menu and enter the menu.
2. You can select the Home Function by pressing the PST, TOUR, PTRN, or SCAN button on your OpenEye Keyboard controller.
3. After selecting the number, move the function number (Each function has maximum numbers). For example, you can have 319 Presets, 8 Tours, 4 Patterns and 8 Auto Scan options. (You can call only saved items)
4. Select Function Time (Select from 10 to 240 seconds)
5. Select Function Mode AUTO/MANUAL (In AUTO Mode, the dome returns to the previous task after completing the HOME FUNCTION)
6. SAVE and EXIT

4. PTZ SETUP MENU

4.2 SYS INFO

The OpenEye OPTIX Camera's set up menu provides essential information about the dome camera if service is required. When you view this screen, you can determine the camera type and ROM version. The information on this screen can't be modified.

For the multi-protocol, please refer to the multi-protocol selection guide. If you want to use other protocols, consult with your local distributor.

Note: If you want to go to the previous mode, select the CLR/ESC key. To exit main MENU without saving, select the MENU button. To exit and save the options, select the save button (OpenEye OPTIX protocol only)

4. PTZ SETUP MENU

4.3 DISPLAY

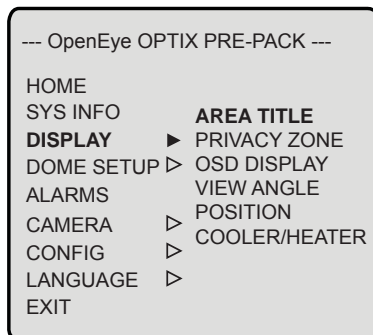

A. AREA TITLE

If this option is enabled, the nearest area title will be displayed when the camera is moving either by manual operation, AutoScan, or Pattern. The DOME camera's [OSD DISPLAY/AREA TITLE] will override this function (Dome Camera's[OSD DISPLAY/AREA TITLE] must be turned ON).

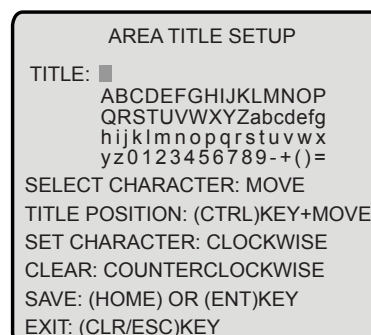

Note: If you want to write the AREA TITLE, select the area title NO. The cursor will be placed in the title line automatically.

1 Select No.

2 Title

3 Start/End.

4. PTZ SETUP MENU

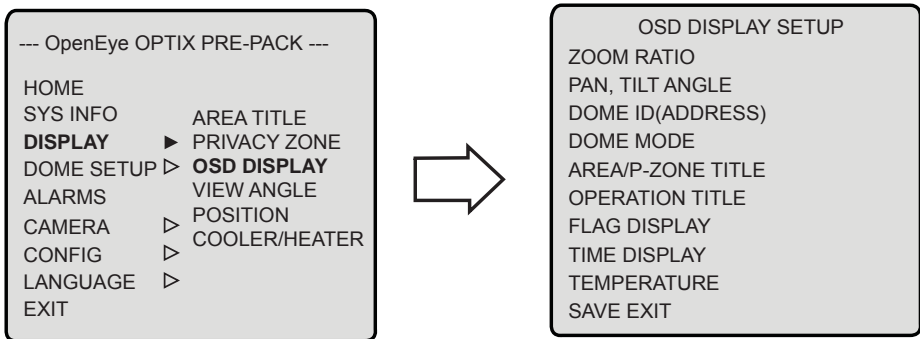

B. PRIVACY ZONE

The Privacy Zone allows users to hide up to 8 unwanted views in a camera.

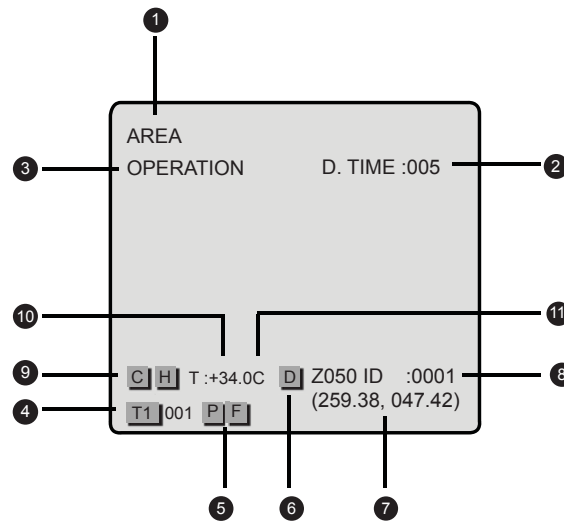

C. ON SCREEN DISPLAY (OSD)

Note: ALL displays or titles will disappeared when you set all flags OFF.

4. PTZ SETUP MENU

- ❶ **Area/P-Zone Title:** You can see the area title, the privacy zone title has priority over the area title.
- ❷ **Time Display:** D. Time/T.Time/A.Time (Dwell/Task/Alarm Time)
- ❸ **Operation Title:** Preset, AutoScan and Pattern Title
- ❹ **Dome Mode:** T1(Tour1) 001(Preset001)
- ❺ **Flag Display:** P F (Privacy/Flip on)
- ❻ **Zoom Ratio:** When the camera is digital zoom, you can see D signal
- ❼ **Pan/Title Angle:** This will show you the position of the camera
- ❽ **Dome ID(Address):** Standard is 999, Optional is 4095
- ❾ **Cooler/Heater Display:** C H (Cooler/Heater On)
- ❿ **Temperature:** Displays the current temperature of the dome
- ⓫ **CELSIUS/FAHRENHEIT Display**

4. PTZ SETUP MENU

D. VIEW ANGLE

Note: When the dome camera is installed near a wall, panning range can be programmed by users.

Flip - Allows the dome camera to automatically turn 180 degrees when the camera tilts to its lower position. Once the camera reaches the floor along a moving object, it will stop.

Over Tilt - The default limit is 80 degrees for Tilt angle. When this mode is on, you can see up to 90 degrees.

PAN LIMIT(ON/OFF): Off - When the dome camera is installed near the wall, PAN LIMIT can be programmed by user to avoid the area obscured by the wall.

MIRROR/REVERSE: Off - Normal image, **H - MIRROR**: Left-right reversal of the image, **V-MIRROR**: Upside down image, **REVERSE**: Left - right reversal and Upside down.

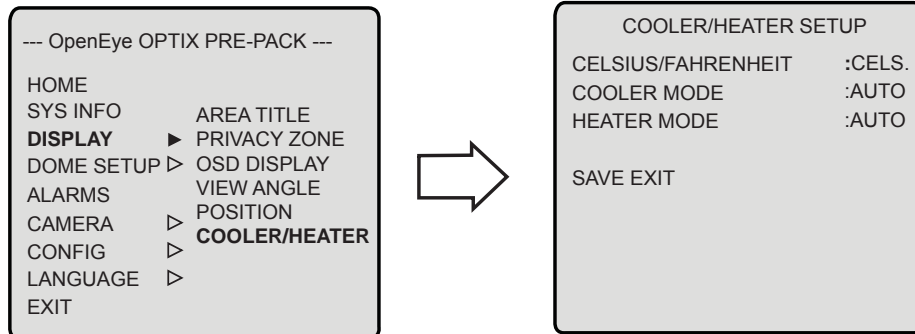

E. POSITION

If the OpenEye OPTIX OSD is obscured on other equipment, like a DVR, you can move the OSD horizontally and/or vertically. The factory position is 33/05 (Horizontal/Vertical). Variable 23~43 for horizontal, 02~15 for vertical.

F. COOLER/HEATER

This function will allow users to keep the inside temperature of the OpenEye OPTIX Pre-Pack at a stable operating condition. If the temperature in the dome is too high, the camera's Auto Mode will regulate the temperature by turning on the Cooler. On the contrary, the heater will make the inside temperature getting higher if the unit is cold.

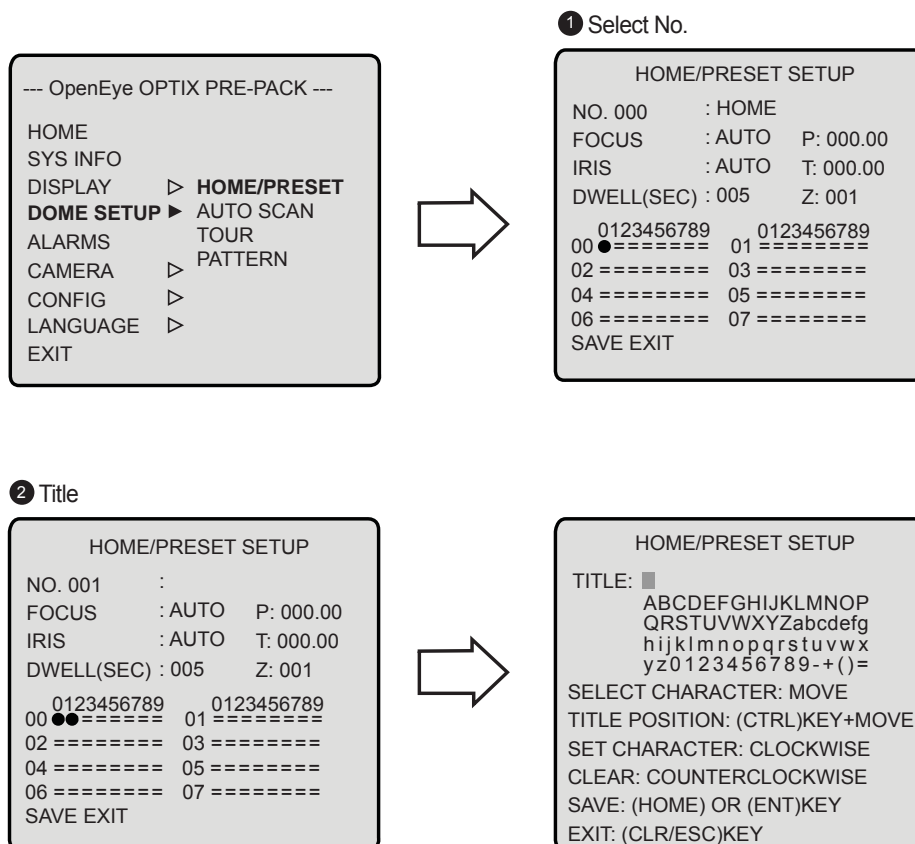

- ① CELCIUS/FARENHEIT: CELS./FAHR
- ② COOLER MODE (ON/OFF/AUTO)
 - ON: Always ON
 - OFF: Always OFF
 - AUTO: ON ; 45° C (113°F)
 - OFF ; 35°C (95°F)
- ③ HEATER MODE (ON/OFF/AUTO)
 - ON: Always ON
 - OFF: Always OFF
 - AUTO: ON ; 0° C(32°F)
 - OFF; 10°C (50°C)

4.4 DOME SETUP

A. HOME/PRESET

If you need to view specific places routinely, program presets is an ideal function. A preset is a programmed video scene with automatic pan, tilt, zoom, focus and iris settings. Once programmed, enter the number and press a preset button on your controller to automatically call up the preset. In addition, presets can be assigned to alarm actions or as the “home” position for the dome camera. As many as 320 presets (HOME included), whose positions are saved in the dome's firmware, may be programmed.

There are four pages of the preset menu, each page can hold 80 presets.

4. PTZ SETUP MENU

- 3 Focus & Iris: Auto/Manual
- 4 Dwell Time: 05~240 sec.
- 5 Pan/Tilt/Zoom

- 6 Preset Call: Input the Preset No. (1~319) and then press the PST button to call the preset
- 7 Preset Erase: Input the Preset No. (1~319) and then press CTRL + PST button for 1 second
- 8 Quick Preset Setup
You can setup the preset without accessing the main menu by moving the camera to the desired position and then pressing NO. + HOME button on your OpenEye keyboard controller

Note: If you press NO. + CTRL + HOME on your OpenEye keyboard controller, the new preset will be programmed automatically without reminding

4. PTZ SETUP MENU

9 Cauton ⚠

If you use quick preset setup, it will overwrite the previous preset.

B. AUTO SCAN

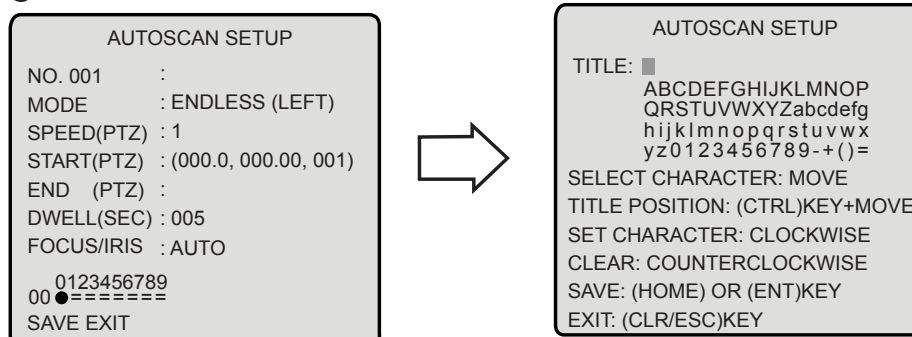

The AUTO SCAN supports up to 8 programmed angles at user-programmable speeds. Follow the steps below to program the AutoScan function.

1 Select No.

Note: Press the SCAN button on your OpenEye Keyboard Controller to go directly to the Auto Scan menu without going through the main menu.

⑥ **Dwell Time:** 05~240 sec.

⑦ **Focus/Iris:** Auto/Manual

⑧ **Auto Scan Call:** Input the Auto Scan No. (1~8) and then press the SCAN button to call the Auto Scan

⑨ **Auto Scan Stop:** If a joystick is connected, move the joystick to stop this function

4. PTZ SETUP MENU

C. TOUR

① Select No.

Note: Press the TOUR button on your OpenEye keyboard controller to go directly to the TOUR menu without going through the main menu.

② Title

③ Speed: 360 deg/sec

Normal: 180 deg/sec

Slow: 90 deg/sec

④ Freeze: On/Off

Allows for the output of a single image while the camera is performing pre-set operations, for example, the camera will output a still image before it finishes pan/tilt operation.

4. PTZ SETUP MENU

5 Mode & No.

Select between 4 different modes and No. (Preset, Auto Scan, Tour and Pattern)

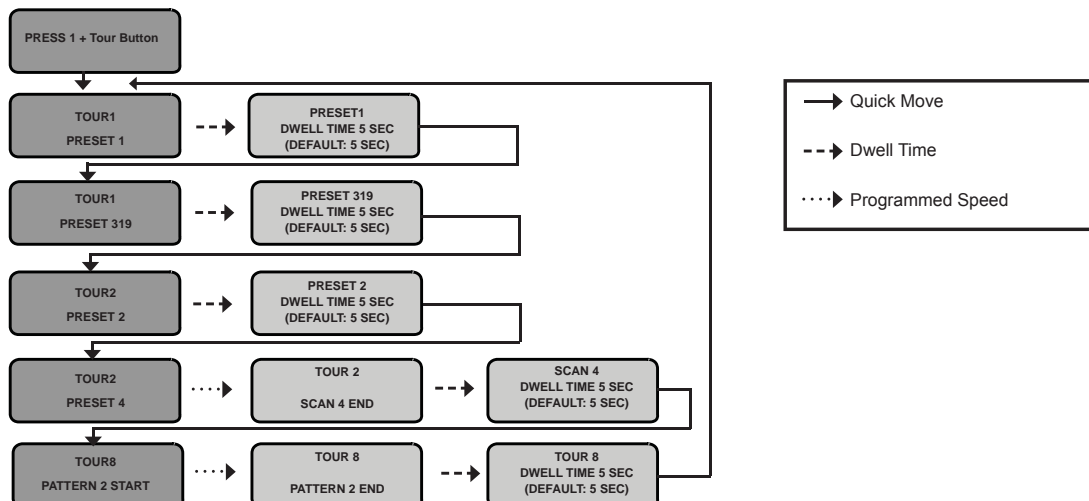

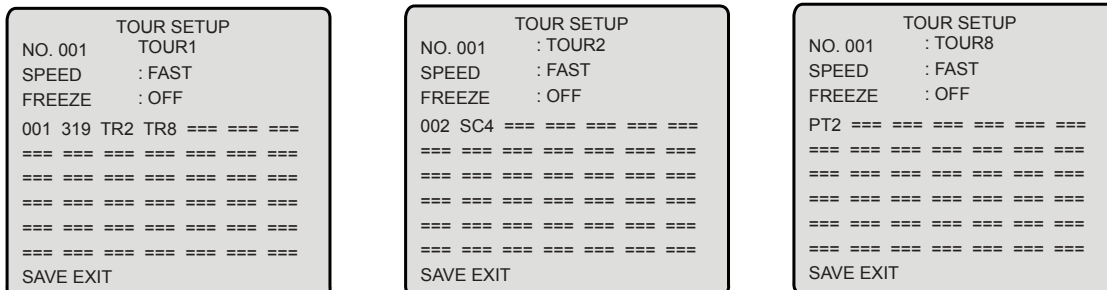

Each TOUR can harmonize 42 different modes among Preset (1~319), AutoScan (1~8), Pattern (1~4) and only Tour1 can obtain Tour 2~8 additionally.
If you want to clear the 4 mode, press the HOME button.

Note: If there is no memorized Preset, AutoScan, Tour or Pattern, you can not set up this function.

6 Tour Call: Input the Tour NO. (1~8) and press the TOUR button to call the Tour.

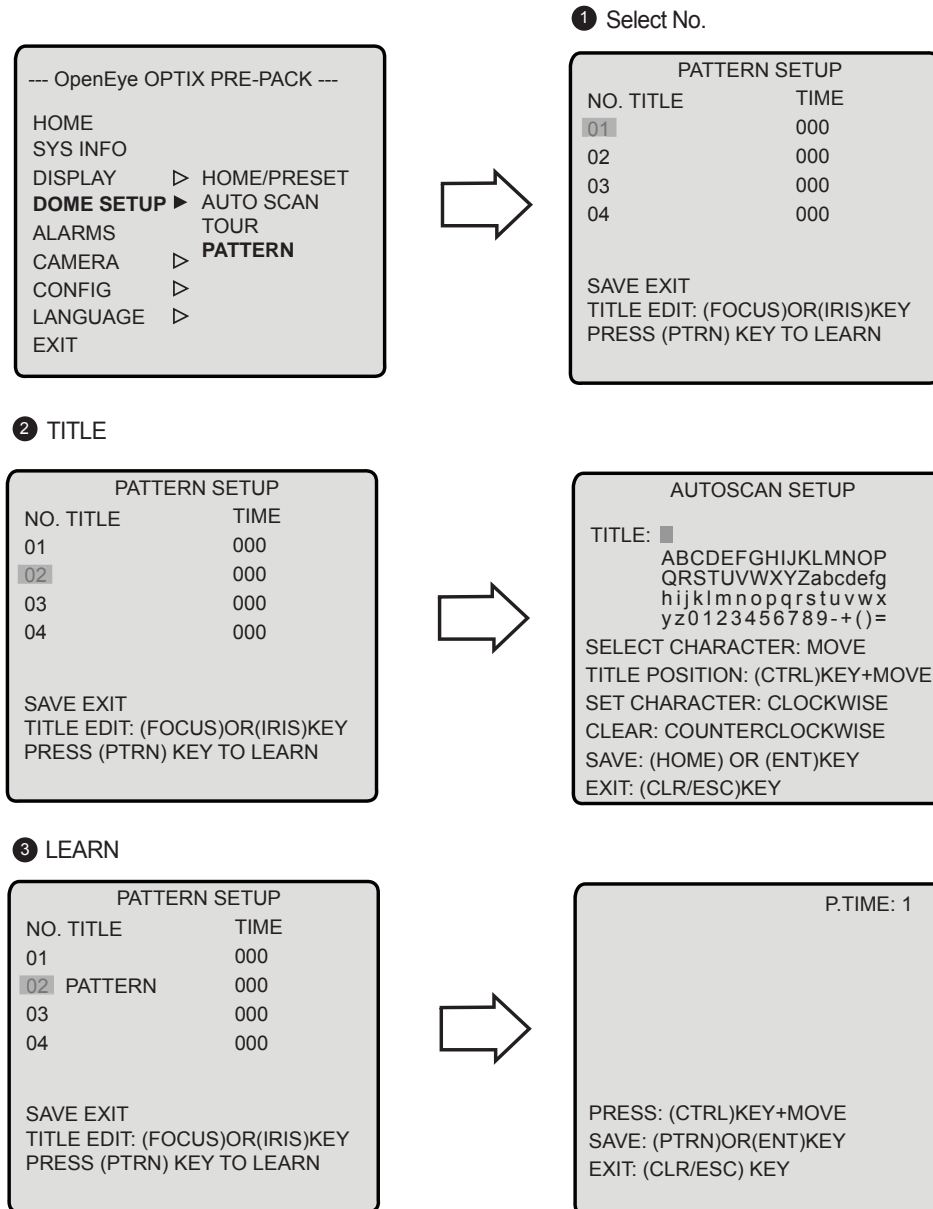

7 Tour Stop: If you have a Joystick connected, move the joystick anywhere to stop the function.

4. PTZ SETUP MENU

D. PATTERN

The pattern feature records a users control of the selected dome camera for up to 240 seconds. Up to four patterns can be stored and played back by pressing No. + PTRN keys subsequently on your Open-Eye Keyboard controller.

4 **Pattern Call:** Input the Pattern NO. (1~4) and press the PTRN button to call the Tour.

5 **Pattern Stop:** If you have a Joystick connected, move the joystick anywhere to stop the function.

4. PTZ SETUP MENU

4.7 CAMERAS

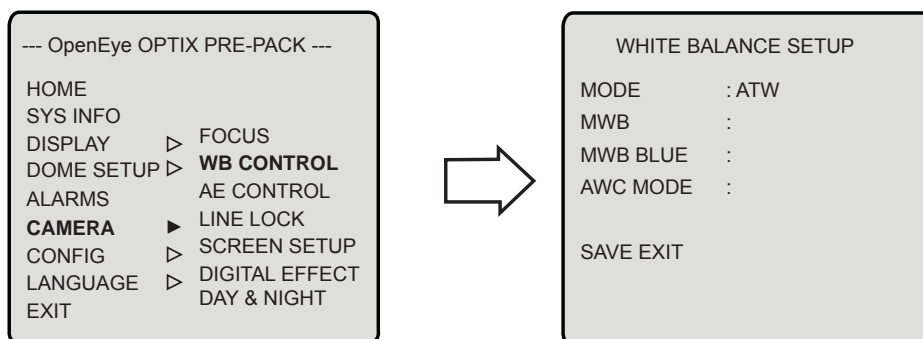

Note: This menu feature will depend on the camera module installed in your dome camera.

A. FOCUS

MODE: AUTO / MANUAL:
Use AUTO mode in normal use.

B. WB CONTROL

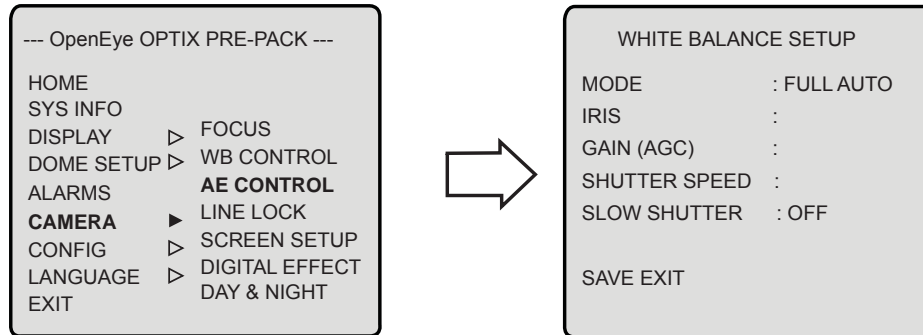

MODE: ATW/INDOOR/OUTDOOR/MWB/AWC
MWBRED (Manual):-3-3
MWBBLUE (Manual):-3-3
AWC MODE (Auto White Balance Control): LOCK/PUSH
INDOOR: Color Temperature to 3200K
OUTDOOR: Color Temperature fix 5400K

Use the ATW mode for normal use.
MWB RED and MWBBBLUE menus are controllable only in MWB. AWC MODE is controllable only in AWC mode. In MWB (Manual WB) or AWC mode.

4. PTZ SETUP MENU

C. AE CONTROL

MODE: FULL AUTO/ SHUTTER FIX/ IRIS FIX/ AGC FIX/ MANUAL

IRIS: CLOSE/ F22/ F19/ F16/ FU/ F11/ F9.6/ F8.L0/ F6.8/ F5.6/ F4.8/ F4.0/ F3.4/ F2.8/ F2.4/ F1.6/ AUTO

GAIN: AUTO /OFF/ 8dB/ 10dB ... / 38dB

The AGC (Off-38 dB) effects only AGC FIX and Manual Mode.

SHUTTERSPEED: 1/60(1/50), 1/100(1/120) ... , 1/3500, 1/4000, 1/6000, 1/10,000

The shutter speed effects only SHUTTER FIX and Manual Mode.

D. LINE LOCK

MODE INTERNAL/EXTERNAL: Adjusts phase of picture with other cameras in EXTERNAL MODE

PHASE 0-255

FACTORY: INTERNAL

Note: USE INTERNAL mode for normal use. If you use NTSC (60Hz) or PAL (50Hz) mode, it is possible to utilize external mode. If you are using NTSC (50Hz) or PAL (60Hz), it is highly recommended to use internal mode.

4. PTZ SETUP MENU

E. SCREEN SETUP

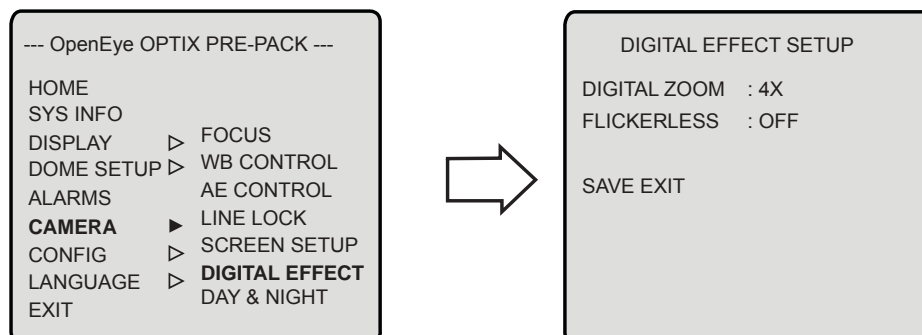

BRIGHTNESS: You can adjust the camera BRIGHTNESS using this mode. (0 ~ 15)

SHARPNESS: The higher the value, the more edges in the picture will be enhanced (0 ~ 15)

BACKLIGHT: Camera background light (On/Off)

F. DIGITAL EFFECT

DIGITAL ZOOM

Off: Zoom range is limited to the optical range

On: 2X/3X/---/9X/10X

The factory default is 4X

FLICKERLESS: On/Off

If the screen appears to pulsate, flicker and/or even roll, it is possible that you need to use FLICKERLESS Control. The main purpose of FLICKERLESS control is to overcome this effect which is caused by the harmonic frequency difference between the cycle of 50Hz fluorescent lighting and the vertical synchronization of the camera which causes the "Flicker" on a monitor. The 50Hz power cycle of a fluorescent light causes a "pulsating" image which is overcome by turning on the FLICKERLESS control.

4. PTZ SETUP MENU

G. DAY & NIGHT

The Day/Night option removes the IR cut filter on the camera and makes the camera sensitive to near infrared. When Day/Night is ON, the color model changes to B&W mode automatically.

The operator can enable Day/Night for all dome cameras at the same time. If the GLOBAL key function is enabled, 21 + GLB will turn Off the Day/Night, 22 + GLB will turn on the Day/Night Mode.

MODE AUTO/ON/OFF

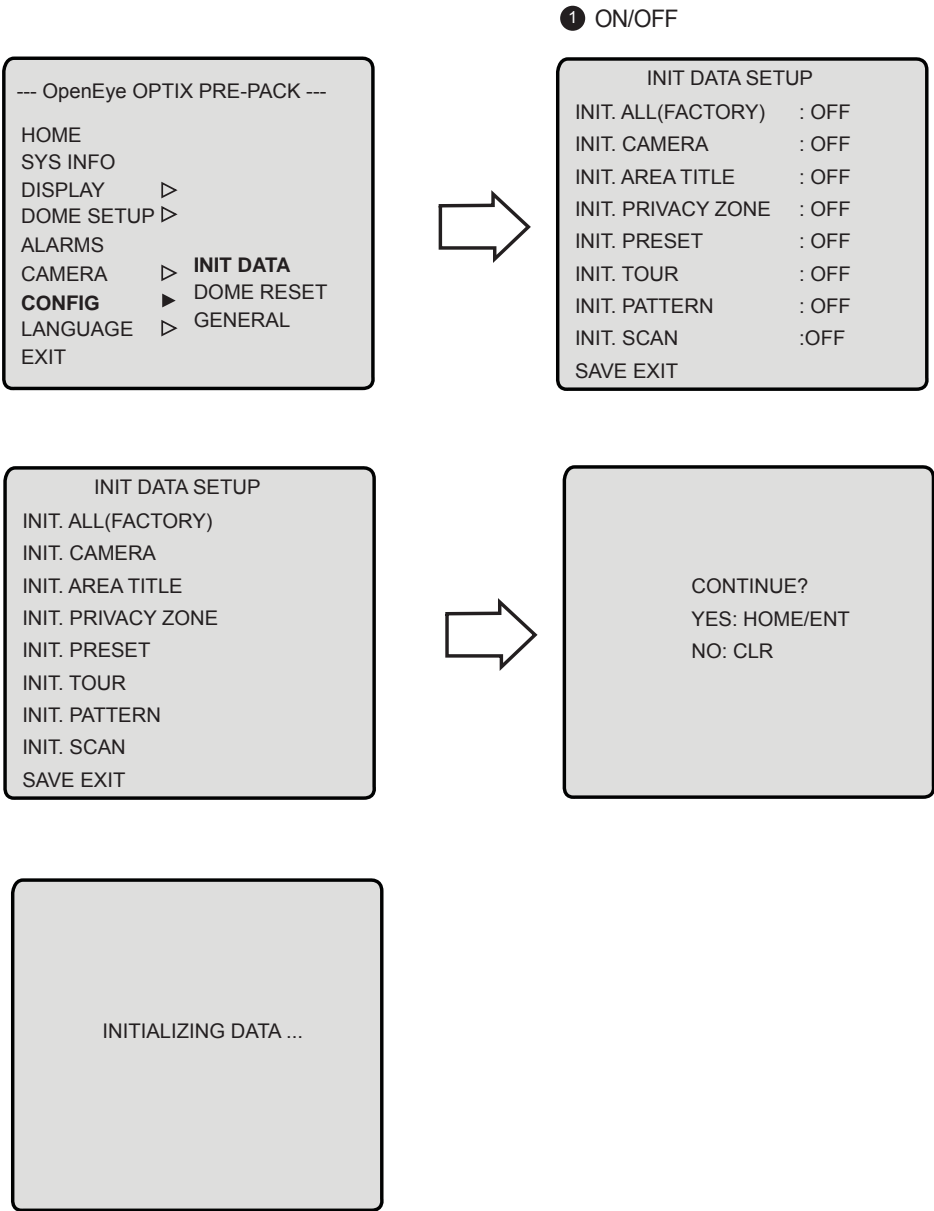

AUTO: Camera goes into Black and White mode at low light.

ON/OFF: It will enable and disable DAY & NIGHT mode of an individual camera

4. PTZ SETUP MENU

4.8 CONFIG

A. INIT DATA

1. INIT. ALL

Erase all stored data from the Flash ROM of the selected dome camera (Factory Default). You will then be asked to enter Yes or No. If you intend to erase all data then press the ENT/HOME Key, otherwise press the CLR/ESC key to exit without erasing. The erased data includes all stored data (Titles, Presets, and Tours).

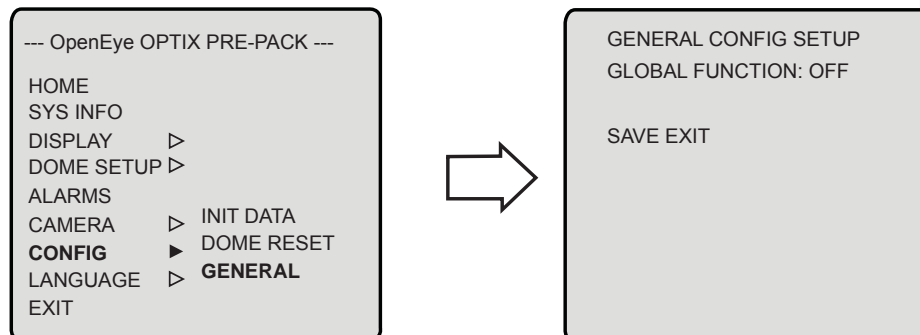

4. PTZ SETUP MENU

B. DOME RESET

This feature is used to reset the micro processor of the dome camera. The main power will be turned OFF and then ON again during this process.

C. RELOAD ID

This feature is used to reload the ID of a selected dome camera after changing the ID without Power Off.

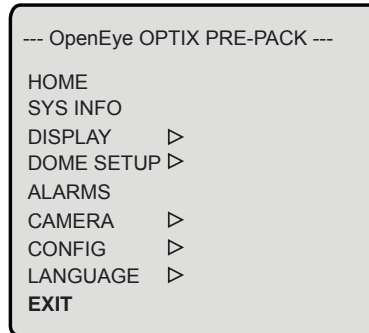

D. LANGUAGE

4. PTZ SETUP MENU

4.9 EXIT

1. To exit the main menu, select the CLR / ESC key or select the MENU / LOCK button.
2. Exit the main menu by selecting EXIT mode

APPENDIX A - TROUBLESHOOTING

If problems occur, verify the installation of the camera with the instructions in the manual and with other operating equipment. Isolate the problem to specific pieces of equipment in the system and refer to the equipment manual for further information.

Problem	Solution
No Video	Verify that power is connected to all pieces of equipment in the system. Verify that the power switches are in the "ON" position.
Poor Video Quality	Check the video connections. Check that the BNC connectors are inserted properly. Check the voltage level of the dome camera. Check that 8-pin cable is connected to the keyboard. 8-pin cable for keyboard is proprietary. Cable for video is shielded.
Dome Cameras lose their positions	Reset the dome camera using the dome configuration menus. Check that the dome cameras are properly in the base. Check the voltage level of the dome camera.
Camera number does not match the multiplexer number	Check the camera ID and insert the BNC cable into the proper input of the multiplexer.
Picture is torn when switching	Check Line Lock setting and adjust phase of L/L.
